Jakarta, Indonesia

## SUMMARY

As an Information and Communication Technology student at Asia e University, currently completing my studies. I hold a Professional Diploma in Software Engineering from CCIT, Universitas Indonesia. I have skills in website development, and also have good understanding of data infrastructure. Throughout my studies, I have engaged in various projects and continuously improve my skills by staying updated with the latest tech trends.

## EXPERIENCE

- Website Developer Freelance**  
PT Jalan Sukses Amanah ↗

12/2024 - 01/2025

  - Developed and maintained a company website using PHP, HTML, CSS, and JavaScript, including dynamic and responsive frontend interfaces.
  - Built a custom CMS using PHP and MySQL to manage website content and database-driven features.
- Web Developer Intern - IT Department**  
PT VIVA Teknologi Integra ↗

06/2024 - 09/2024

  - Redesigned the Human Capital Information System (HCIS) application using Figma to improve usability and create a modern user interface aligned with business requirements.
  - Collaborated with the IT team and stakeholders to ensure design alignment with system workflows and implemented the redesigned application using Laravel in accordance with development standards.
  - Developed and refined a responsive web interface using HTML, CSS, and Bootstrap, including UI alignment with the company's branding as well as basic testing and bug fixing.
- Convocation CCIT FTUI Universitas Indonesia - Event Division**  
CCIT FTUI Universitas Indonesia ↗

10/2023 - 11/2023
